

Overview

This document provides a high level description of the new features and minor fixes available with the PhoneGuide LIVE! 7.4 release. PhoneGuide LIVE! 7.4 was released primarily to modify the web interface login screen and support custom logo for web pages.

Minor Enhancements

This section lists the minor enhancements that are included in PhoneGuide LIVE! 7.4 release.

- The Administrator may now upload a custom logo that will be presented in the left menu bar of the web interface, just above the logout button.
- Updated HiPath 8000 terminology to reflect Siemen's OpenScape Voice naming convention.
- New optiPoint 420 Standard template for OpenScape Voice platform.
- Updated the web interface login screen.
 - Disabled the requirement to type in a Name. The Name field has been removed.
 - The user will now type in an extension/user type and hit Login. If the extension/user type is not unique, the User Group dropdown list will appear, the user will select the appropriate group and hit Login again.
- Minor updates to phone feature text help.
