Major Feature Enhancements

This section highlights the major feature enhancements for the PhoneGuide LIVE! 7.3 release.

1. HiPath 8000 Training

PhoneGuide LIVE! now supports a centralized training solution for all HiPath 3000, HiPath 4000 and HiPath 8000 users. This new release introduces training for the HiPath 8000 platform, including:

- Getting Started video to introduce users to basic phone operation and features
- Feature tutorials including step-by-step instructions
- Customized feature training based on user's optiPoint 420 Standard or OptiPoint 420 Advance Display phone template
- Helpful online documents including Quick Reference Guides, User Guides, Feature Step-by-Step Instructions and Decision Tree documentation.

Minor Enhancements

This section lists the minor enhancements that are included in PhoneGuide LIVE! 7.3 release.

- Supports import of Call Log feature for HiPath 4000 release 3 switch by adding Call Log encoded value to database.
- Minor updates to phone feature text help
