

## Overview

This document provides a high level description of the enhancements available with the PhoneGuide LIVE! 8.3 release. PhoneGuide LIVE! 8.3 was released primarily to support enhancements for OpenStage V2 R1 phones.

## Enhancements

Listed below are the enhancements that are included in the PhoneGuide LIVE! 8.3 release.

- Phonebook feature support available for OpenStage 40 SIP phone
  - Updated OpenStage 40 QuickStart Guide
  - Updates to Menu feature online help and Menu Feature PDF
- Updated Ringer Off feature to include the option off using the Star (\*) key to toggle ringer on and off
- For OpenStage SIP phones, added new text help to highlight prompt that appears when pressing sensor keys to enter programming mode
- For a subset of phone models (OpenStage 40, 60 and 80 SIP and OpenStage 60 and 80 HFA), added help text for setting the display time for context menu. New help appears on Menu feature page.
- New User Guides for OpenStage SIP phones
- Administrator may update the URL if the IP address or the DNS name changes
- HiPath 4000 switches can now filter phantom phones from the Phone Import by means of a specified list of phantom codes in the Switch properties of the User Group.
- Support for 64 bit database server.
