

Before ordering servers or workstations please confirm the specifications shown below with Impact Technologies as specifications are subject to change without notice.

Impact Technologies leverages web collaboration technologies for remote installation and support. This requires the Impact Technologies technical support team be provided remote access to all servers and workstations.

**Server for Traffic Analyst Application and Web Services**

The server configuration for hosting the Traffic Analyst and OnTraQ applications depends on the modules in use, the switches and the means of communication.

OnTraQ Note: The Traffic Analyst application can reside on the same physical server as OnTraQ Servers. In the case where multiple OnTraQ Servers are required, it is then recommended to install OnTraQ on separate servers.

	<b>Dedicated</b>	<b>Virtual Machine</b>
Processor Minimum	Two (2) Processors: 2 GHz Intel Xeon Quad Core	Three (3) Cores assigned to Traffic Analyst, plus one (1) Core for OnTraQ
Memory Minimum	10 GB 1333 MHz optimized for two (2) processors	10 GB with 8 GB dedicated/reserved
Disk Storage	<ul style="list-style-type: none"> <li>◆ Minimum: 500 GB available to application</li> <li>◆ Minimum: 10,000 RPM hard drive</li> </ul>	<ul style="list-style-type: none"> <li>◆ Minimum: 500 GB</li> <li>◆ 10,000 RPM hard drive, iSCSI or FiberChannel</li> </ul>
